

GAC's In-Ovation® L

Leading the Way in
Self-Ligating Lingual Brackets

The Perfect Esthetic Solution

More and more, adults want to experience the benefits of a perfect smile, without the obvious appearance of metal or ceramic brackets. Now you have a completely undetectable solution to offer your patients with In-Ovation® L.

In-Ovation L Patient Benefits

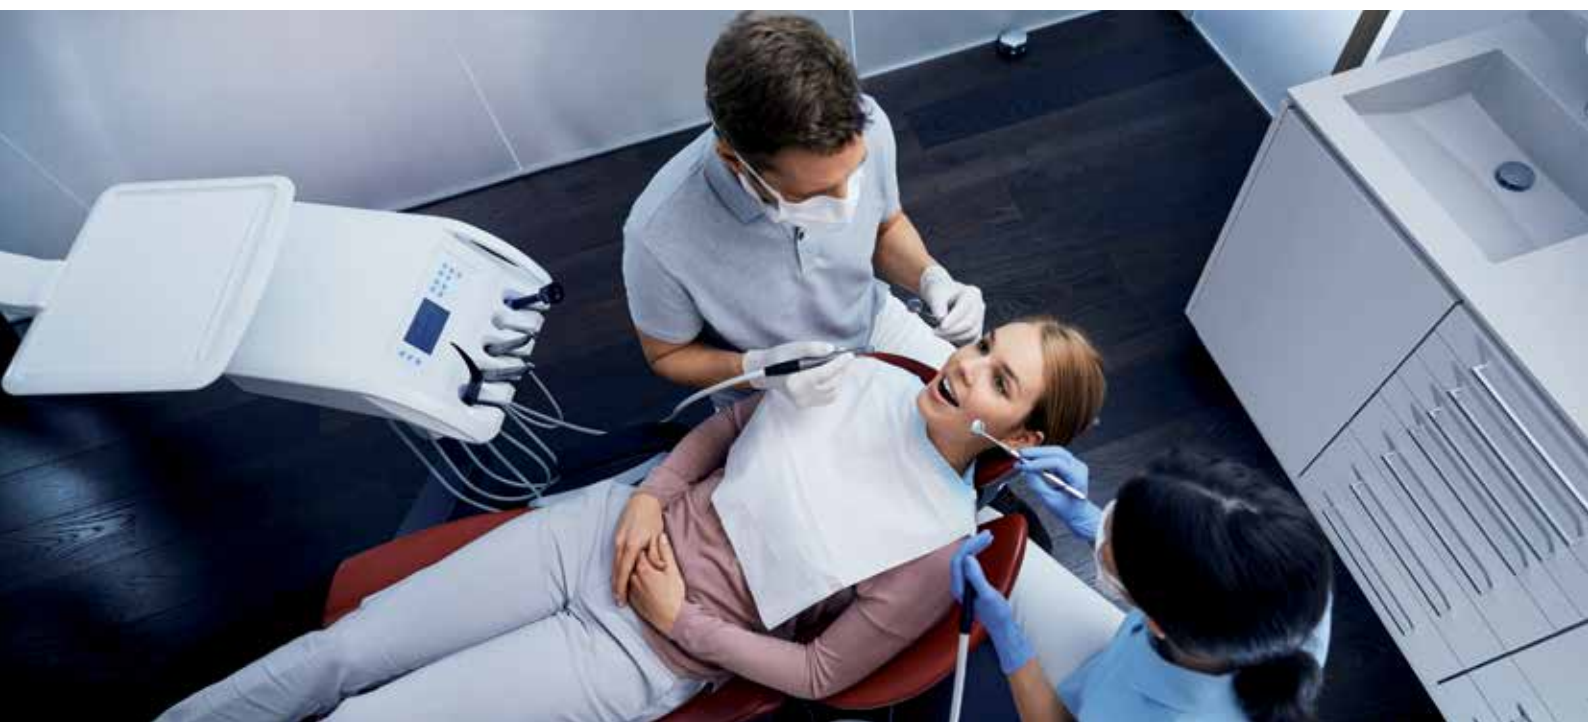

- Absolutely undetectable
- Small, comfortable to wear
- Speak clearly and confidently
- Extended intervals between appointments
- Short treatment time
- Minimal chair time

Unprecedented Ease of Use

In-Ovation L leverages all the advantages of the In-Ovation self-ligating line of brackets to solve one of the biggest problems doctors have traditionally encountered with lingual systems — archwire ligation. The In-Ovation L clip opens and closes easily and quickly to make archwire ligation literally a “snap.”

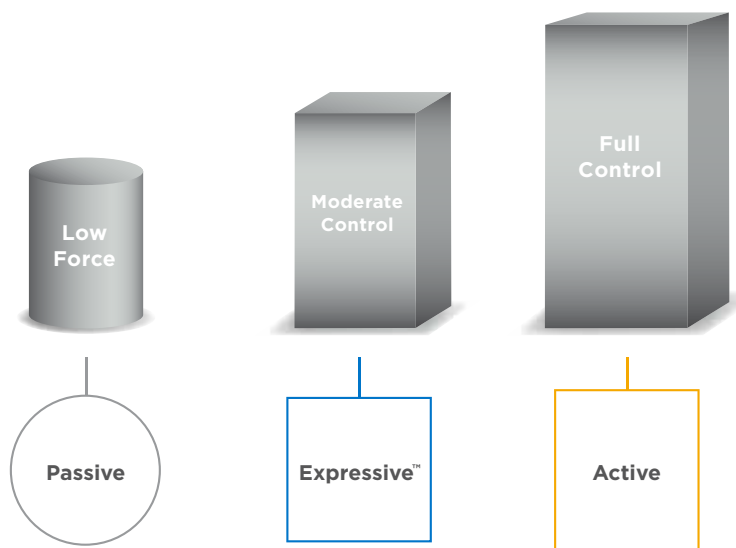

Doctor and Staff Benefits:

- Interactive spring clip providing passive, expressive and active wire engagement for optimal control at each phase of treatment.
- Advanced manufacturing process leverages In-Ovation System success.
- Completely undetectable solution option for patients seeking invisible braces
- Low profile for patient comfort and avoiding gingival interference for better patient experience
- Beveled slot walls facilitates wire engagement and superior sliding mechanics
- True Twin Design offers optimal mesial, distal span for achieving superior rotation control

Experience the difference of In-Ovation L

GAC has translated the proven clinical benefits of In-Ovation into a lingual design. Only an interactive bracket provides full functionality throughout the course of treatment. This allows you to enjoy the early benefits of a free sliding, passive design and the precise control of an active one in the later stages of treatment. The In-Ovation L self-ligating bracket gives you a complete range of control options ... simply by changing the archwire.
